

Preferred Utilities Manufacturing Corporation

"A Tradition of Excellence in Combustion Technology Since 1920"

Fuel Oil Handling – Fired Equipment Control and Instruments – Combustion Systems – Nuclear Outage Support

31-35 South Street - Danbury, CT 06810 - Tel: (203) 743-6741 - Fax: (203) 798-7313 - www.preferred-mfg.com

To purchase and install BMU_edit, follow these five easy steps:

1. Send a P.O. to Larry Creagh. He will e-mail you the sales order number for the BMU_edit software.

2. Download the latest BMU_edit zip file at

<http://preferredinstruments.com/downloads/BMUEditSetup.zip>

(It's a big file, so download it where you have a fast internet connection)

3. Install it on your machine, run it, and the software will provide you a product key.

4. E-mail:

Your Name

Company Name

PO# or SO#

BMU Edit Product ID

Windows Product ID (optional)

to softwarekey@preferred-mfg.com.

If this is your free version, include the product key and the words "Free sample." You'll get an activation code back by e-mail shortly.

5. Type in your activation code and you should be good to go.

You connect to the BMU using a USB A/B cable. When you connect your laptop to the BMU, the "Found New Hardware" routine should run. Once your PC has found the BMU, communicating with it is pretty reliable.

If you have any questions, contact me or your RSM.

David Eoff
